TO CORRESPONDENTS.

"*French Burr Stones.*"—A correspondent asks for "information about French burr stones; what quarries they come from; what in the geological structure of the stone; and whether the stone from Andernach on the Rhine is used in England for milling purposes?"

"H. M'C.," "W. T.," "J. B.," (P. shall not be overlooked if opportunity offers), "W. G. H." (declined with thanks some time ago), "J. B.," St. Pancras, "Miss C.," "G. S.," Cardiff, "Lady J.," "C. F. J.," "T. T." (the editor regrets misunderstanding T. T.'s wish), "C. G." (we could not advocate such a proposition), "H. T. E.," "W. C. P." (let the set off run round on same level), "W. C. L.," "E. J.," Taunton, "Ebeu l'fugaces," "C. B.," "J. R." (compelled uniformly to decline), "H. D.," "An Articled Pupil," "H. D." Liverpool (we fear our correspondent's *miniature model* would have little effect in proving to the public what can be done in brickwork).

NOTICE.—All communications respecting *advertisements* should be addressed to the "Publisher," and not to the "Editor;" all other communications should be addressed to the EDITOR, and *not* to the Publisher.

"*Books and Addresses.*"—We have not time to point out books or find addresses.

JNO. HOLMES, Agent.

IMPROVED OAK STAIN.—H. R. IBBOTSON, VARNISH MAKER, Hammersmith, begs to call the attention of architects, builders, &c., to his improved OAK STAIN of any shade, now in general demand. It is greatly superior to all other stains, as it can be laid on the naked wood without size or other preparation, and, being an oil stain, will not wear off. Pattern Boards may be seen at the Office of "The Builder," or had at the Manufactory.

IMPORTANT to PAINTERS and Others. —The IMPROVED REGISTERED PAINTING BRUSH is acknowledged by all that have used this really valuable improvement, to be twofold, by the application of a newly arranged metallic copper binding, which is superior to string or wire in the following advantages:—They are warranted not to come to pieces, in varnish or any spirits; it is impossible for the handle to move when left in; no other can equal them for utility, lightness, and durability. Sold by JAMES PAGE, Varnisher and sole manufacturer, Residence, 19, Swan street, Dover-road, Southwark.

TO BUILDERS, CONTRACTORS, ENGINEERS, NOBLEMEN LANDED PROPRIETORS, AGRICULTURISTS, AND OTHERS.

THE PATENT ALKALI COMPANY'S METALLIC BLACK, BRIGHT RED, and PURPLE-BROWN PAINTS are applicable for covering iron and woodwork of every description, also stuccoed and brick buildings, and are remarkable for their superior preserving properties, cheapness, and durability.—Offices of the Company, 1, New Broad-street, London.

JOHN A. WEST, Secretary.

BELL'S PATENT LIQUID CEMENT is ready for use, and only one-eighth the cost of oil-paint. For beauty it is pre-eminent, giving the exact appearance of FINE CUT STONE. Can be used at once on fresh Roman Cement, or any other plastering, and will protect the walls as well as Roman Cement. In casks of 1, 2, and 5 cwt., at 2s. 1½d. and 2½d. casks inclusive.

PATENT MINERAL PAINTS.

Invaluable for cheapness, beauty, and permanence; and half the cost of other paints, always ready for use, will keep good for years, and for outside work well suited for superstructures. Brilliant black, 2s.; rich brown, 2s. 8d.; green and light colours, 4s. per gallon.

G. BELL and Co., 2, Wellington-street, Gravel-street.

PATENT WHITE ZINC PAINT.—Agents in England, C. DEVAUX and Co., 42, King William-street, City; T. BROWN, 25, Frances-street, Farringdon-square.—The Patent White Zinc Paint is superior in every respect to white lead paint. Its superiority is clearly proved by the fact of the French Government having adopted for all public works the white zinc paint, to the entire exclusion of white lead paint.—Its removal of the perfectly harmless qualities, being in no way injurious to health, to all users of manufactures and use.—Its superiority in resisting the influence of the atmosphere.—Its great durability and permanency of colour. The white zinc enamel paint of these patents, invariably encountered by white lead upon the human frame, neither painters' colic, nor paralysis, &c., to which dangerous complaints the workmen who manufacture and use it are subject, and to which persons who inhabit newly-painted apartments are also liable.—For further particulars apply to the Agents.—London, May 8, 1850.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and, through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made the Cement will be manufactured in London, and thus presented to consumers in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for shutters, architraves, and panel mouldings, and for in-door flooring, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When used as a stucco it does not require to be turned to damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it carries four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, point it out as the fittest material for building sea and embankment walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.

Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 36, Basil-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to No. 224, page 467; and also Nos. 254 and 256, pages 545 and 551 of "The Builder," for measure of EXPERIMENTS on the strength of Portland Cements, to prove the great superiority of their Cement as manufactured. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, crystalize, or turn green; nor is it affected by any atmospheric influence whatever the chemicals prevailing alike the action of frost and heat. It is manufactured to set in from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also at their Depôt, 26, Hanover-street, Liverpool.

THE PARIAN CEMENT, for INTERNAL STUCCO.

No. 4, Porchester-terrace North, Paddington, 13th February, 1850.

Dear Sirs,—I have been reluctant to speak to the merits of Parian Cement, until sufficient experience enabled me to do so. As an extensive user, I have given it many trials, and now have to express my perfect satisfaction with it. The house from whence I date was first inhabited by me on 7th September last, and a brush having been laid before the 1st of June—that is to say, in three months and one week!—I stuccoed the walls throughout with Parian papered mine, painted and grained others, and the whole work has been dry and perfect from that hour. I need say no more.—I am, Gentlemen, yours respectfully,

WM. SCANTLEBURY.

Messrs. Chas. Francis and Sons, Nine Elms.

MARTIN'S PATENT FIRE-PROOF AND ORNAMENTAL CEMENT, APPLICABLE FOR ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has now been before the public for many years, and obtained so high a standing in the estimation of all who have used it, that it is unnecessary to enter more into its merits. Messrs. STEVENS and SON however feel called upon to observe, that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, there will be found a gain of 16 per cent. in material, half the work less in price, with no additional outlay in labour of 10 per cent., by its allowing about forty minutes for working, being less than one-fourth of the time of other cements of a similar nature, therefore worked with greater facility, making together the enormous saving of full THIRTY-THREE PER CENT.—Its endurance therefore cannot admit of doubt. Specimens showing its beauty, hardness, and appropriability to all plain and ornamental purposes, may be seen; and the Cement, in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, 101, Devereux-lane, London.—Manufactory, Derwent Mill, Derby.

N.B. This Cement will receive paint or paper in a few hours after the completion of the work by the plasterers.

JOHNS and Co.'s PATENT PERMANENT STUCCO WASH, CEMENT, and PAINT.—Be attention of the trade and the public generally is solicited to these very excellent and well-known materials, which, for their beauty, durability, impermeableness, and cheapness are unequalled. THE PERMANENT WASH, as a substitute for common lime-wash or water colour, is unrivalled, as it can be laid on with a long brush for decorated brick-work; it is of a more colour, but may be tinted to any other; is perfectly dry in twenty-four hours, will not wash off, is very little dearer than the common washes, and, being a non-absorbent, is admirably adapted for railway stations, union workhouses, asylums, &c., in which, also, it is well suited to cover with two coats 100 square yards. THE CEMENT, from the great reduction in price, and its suitableness for internal as well as external surfaces, places it above all other materials of its kind: it has no caustic qualities; may be painted or papered in a few days; after Nature's process, or exposure, soon becomes as hard as stone; and may be cleansed with a brush and water. The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained on application to the Sole Agent, Mr. PHILIP HARE, at the Warehouse, 72, Steel yard, Upper Thames-street. A liberal allowance to wholesale dealers.

TO BUILDERS, CONTRACTORS, &c.

GREY-STONE LIME, of the best quality, may be had at Whitehall-yard, Charing-cross, Westminster, at 7s. 6d. per yard; or at Hanover-wharf, St. Edward-street, Regent's-park, at 8s. 6d.—Apply to CHARLES FORMBY, Esq., Lime Works, Halling, near Rochester; or Mr. TREMAIN, 68, Edward-street, Regent's-park.

GRAY STONE and WHITE FLAME LIME WORKS, BEWLAY CLIFF, on the Medway, KENT.—GEORGE POTTER and CO., having added the old and well-known business at the Purfleet Wharfs, Earl-street, Blackfriars, and Camden-town, to their former town establishments are ready to supply Contractors, Builders, Coal Companies, and the Trade generally, with Gray Stone, White Flame, and Chalk Lime, upon the usual terms. Annexed is a list of their wharfs:—

City—Purfleet Wharf, Earl-street, Blackfriars.
Pimlico—Grosvenor Basin.
Chelsea—Dyson's Wharf.
Paddington—No. 18, North Wharf, adjoining Great Western Terminus.
Camden-town—James-street.
